# **TECHNICAL DOCUMENT**

# Type S030

# Inline sensor-fitting with paddle wheel for flow measurement

FLUXER

- DN 06 to DN 65
- Wide range of materials and type of process connections available to ideally fit to the individual applications and process conditions
- Closed pipe system, sensor inside fitting
- Quarter-turn technology
- Transmitter available for indication, monitoring, transmitting, On/Off control or batch control

Product variants described in the data sheet may differ from the product presentation and description.

#### Can be combined with

**Type SE30** Transmitter for Inline sensor-fitting

**Type SE35** Transmitter or batch controller for Inline sensor-fitting

Type SE36 ELEMENT transmitter for Inline sensor fitting

Type 8611 eCONTROL - Universal controller

# Type description

The sensor-fitting Type S030 has a built-in paddle wheel to measure the flow rate and is especially designed for use with neutral, slightly aggressive, solid free liquids.

The compact sensor-fitting (Type S030) must be equipped with a Bürkert transmitter (Type SE30, SE30 Ex, SE32, SE35, SE36 or 8611) quickly and easily connected together by a bayonet catch. The Bürkert "Inline quarter-turn" technology is a construction ensuring a leakage free operation.

The paddle wheel rotation (permanent magnets included in the blades) is detected contactless by the sensitive element of the transmitter through the sensor-fitting wall. The transmitter can be fitted and removed without opening the pipe or interrupting the running process.

# 1. General technical data

#### Note:

In the range of sensor fittings, there are specific ones for the measurement of flow rates at high temperature and pressure. These are the S030-HT models, which can only be used with the SE30 transmitter in the high temperature variant (SE30-HT).

#### **Product properties**

#### Material

Make sure the device materials are compatible with the fluid you are using.

Non wetted parts	
Screw	Stainless steel (316L - 1.4404)
Netted parts	
Body, sensor armature	Stainless steel (316L - 1.4404), brass (CuZn <sub>39</sub> Pb <sub>2</sub> ), PVC, PP or PVDF (depending on the sensor fitting variant Type S030)
Axis	Ceramics (Al <sub>2</sub> O <sub>3</sub> )
Bearing	• Ceramics (Al <sub>2</sub> O <sub>3</sub> )
	<ul> <li>Iglidur<sup>®</sup> (only for Type S030-HT variant)</li> </ul>
Paddle wheel	PVDF
	<ul> <li>Stainless steel (316L - 1.4404) (only for Type S030-HT variant)</li> </ul>
	PP on request
Sensor-fitting body	Stainless steel (316L - 1.4404), brass (CuZn <sub>39</sub> Pb <sub>2</sub> ), PVC, PP or PVDF (depending on the sensor fitting
	variant Type S030)
Seal	FKM or EPDM (depending on the sensor fitting variant Type S030)
De est e e l'he 'l'h	Further information can be found in chapter "11.3. Ordering chart accessories" on page 19.
Compatibility	<ul> <li>Bürkert flow transmitter Type SE30, SE30 Ex, SE32, SE35, SE36, batch controller SE35 or 8611 Universal controller</li> </ul>
	<ul> <li>Bürkert flow transmitter Type SE30-HT (only for Type S030-HT variant)</li> </ul>
Pipe diameter	DN 06DN 65
Dimensions	Further information can be found in chapter "4. Dimensions" on page 6.
Measuring principle	Paddle wheel
leasuring range	Flow rate: 0.51200 l/min (0.13317 gpm)
Performance data	
Measurement deviation	<ul> <li>Teach-In (via a remote transmitter): ±1% of the measured value<sup>1.)</sup> at teach flow rate value</li> </ul>
	<ul> <li>Standard K factor: ±2.5% of the measured value<sup>1.)</sup></li> </ul>
_inearity	$\pm 0.5$ % of full scale <sup>1.)</sup>
Repeatability	$\pm 0.4$ % of the measured value <sup>1.)</sup>
Medium data	
Fluid	Clean, neutral or slightly aggressive, solid-free liquids
Fluid temperature	For sensor-fitting in:
	• PVC: 0+50 °C (+32+122 °F)
	• PP: 0+80 °C (+32+176 °F)

Process/Pipe connection & con	nmunication					
Measuring devices connection	Bürkert bayonet catch					
Pipe connection	For sensor-fitting in:					
	<ul> <li>plastic: true union with nut and solvent/fusion socket, spigot or external thread</li> </ul>					
	<ul> <li>metal: internal or external thread, weld ends, clamp or flange</li> </ul>					
	• stainless (Type S030-HT variant): internal or external thread, weld ends (clamp or flange on request)					
Approvals and conformities						
Directives						
CE directive	Further information on the CE directive can be found in chapter "2.3. Standards" on page 4.					
Pressure equipment directive	Complying with article 4, paragraph 1 of 2014/68/EU directive Further information on the pressure equipment directive can be found in chapter "2.4. Pressure					
	Equipment Directive (PED)" on page 4.					
Foods and beverages/Hygiene	FDA declaration of conformity (stainless steel fitting only with EPDM seal) Must be ordered separately. Further information can be found in chapter "Accessories for					
	all variants" on page 23.					
Materials	<ul> <li>Inspection certificate 3.1 (according to EN-ISO 10204)</li> </ul>					
	Certification of conformity for the surface finish (according to DIN4762, DIN4768, ISO/4287/1)					
	Must be ordered separately. Further information can be found in chapter "Accessories for all variants" on page 23.					
Others	3 points flow calibration certificate					
	<ul> <li>Test report 2.2 (according to EN-ISO 10204)</li> <li>Must be ordered separately. Further information can be found in chapter "Accessories for all variants" on page 23.</li> </ul>					
Environment and installation						
Ambient temperature	Operation and storage: for sensor-fitting in					
	• PVC: -15+60 °C (+5+122 °F)					
	• PP: -15+80 °C (+5+176 °F)					
	<ul> <li>PVDF, stainless steel or brass: -15+100 °C (+5+212 °F)</li> </ul>					
	The temperature limits also depend on the used transmitter, see the relevant data sheet or operating instructions for more information.					

1.) Under reference conditions i.e. measuring medium = water, ambient and water temperature = +20 °C (+68 °F), observing the minimum the minimum inlet and outlet sections and the appropriate inner diameter of the pipe.

# 2. Approvals and conformities

#### 2.1. General notes

- The approvals and conformities listed below must be stated when making enquiries. This is the only way to ensure that the product complies with all required specifications.
- Not all available variants of the device can be supplied with the below mentioned approvals or conformities.

#### 2.2. Conformity

In accordance with the Declaration of Conformity, the product is compliant with the EU Directives.

#### 2.3. Standards

The applied standards which are used to demonstrate compliance with the EU Directives are listed in the EU-Type Examination Certificate and/or the EU Declaration of Conformity.

#### 2.4. Pressure Equipment Directive (PED)

The device conforms to article 4, paragraph 1 of the Pressure Equipment Directive (PED) 2014/68/EU under the following conditions:

#### Device used on a pipe

#### Note:

- The data in the table is independent of the chemical compatibility of the material and the fluid.
- PS = maximum admissible pressure (in bar), DN = nominal diameter of the pipe

Type of fluid	Conditions
Fluid group 1, article 4, paragraph 1.c.i	DN ≤25
Fluid group 2, article 4, paragraph 1.c.i	DN ≤32 or PS*DN ≤1000
Fluid group 1, article 4, paragraph 1.c.ii	DN ≤25 or PS*DN ≤2000
Fluid group 2, article 4, paragraph 1.c.ii	$DN \leq 200 \text{ or } PS \leq 10 \text{ or } PS^*DN \leq 5000$

#### 2.5. Foods and beverages/Hygiene

#### Note:

The specific sensor fittings (S030-HT) for the measurement of flow rates at high temperature and pressure is not covered by this certificat.

Conformity	Description
FDA	FDA – Code of Federal Regulations (valid for the variable code PL02, PL03)
	The variants with the body and the sensor armature made of PVDF or stainless steel materials, the paddle wheel made of PVDF material and the seal made of FKM or EPDM materials are compliant in their composition with the Code of Federal Regulations published by the FDA (Food and Drug Administration, USA) according to the manufacturer's declaration.

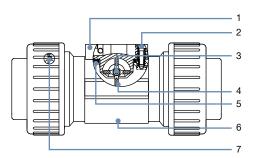

# 3. Materials

# 3.1. Material specifications

#### Note:

The following picture describes the sensor-fitting with a process true union connection with nut and solvent/fusion socket, but this also applies to all variants of process connection.

No.	Element	Material
1	Sensor armature	Stainless steel

# 5. Performance specifications

# 5.1. Pressure temperature diagram

#### With sensor-fitting S030 standard

#### With sensor-fitting S030-HT

#### **Product installation** 6.

#### 6.1. Installation notes

#### Flow measurement

#### Note:

The device is not suitable for use in gaseous media and steam.

Minimum straight distances upstream and downstream of the sensor must be observed. These stabilizing distances depend on the pipe's design. Increasing these distances or installing a flow conditioner may be necessary to obtain the best accuracy. For more information, refer to EN ISO 5167-1.

EN ISO 5167-1 specifies the straight inlet and outlet distances that must be complied with when installing fittings in pipe lines in order to achieve calm flow conditions. The most commonly used elements that could lead to turbulence in the flow are shown below. The related minimum inlet and outlet distances that ensure a calm flow are also specified.

Fluid direction ⇒

Make sure that the measuring conditions at the point of measurement are calm and problem-free.

2 x 90° elbow joint Regulating valve<sup>1.</sup> Expansion<sup>2.)</sup> 2 x 90° elbow joint 90° elbow joint Reduction 3 dimensional or T-piece DN 5 20

If the valve cannot be mounted after the measuring device, the minimal distances have to be respected.
 If an expansion cannot be avoided, the minimal distances have to be respected.

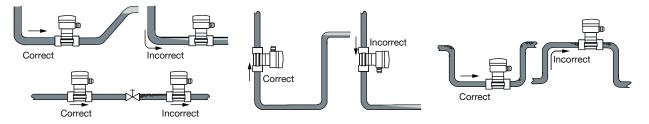

DN = Orifice

Please note minimum flow velocity

The complete measuring device can be installed in either horizontal or vertical pipes, but following additional conditions should be respected:

The pipe always has to be filled with fluid at all times near the device. •

The pipe design must be such that no air bubbles or cavitation can form within the medium near the device at any time.

Pressure and temperature ratings must be respected according to the selected fitting material. The suitable pipe size is selected using the diagram in the chapter "Nominal size selection" of the fitting, see chapter "6.2. Selection of the nominal diameter" on page 13.

#### 6.2. Selection of the nominal diameter

The following graph is used to determine the appropriate DN of the pipe and fitting for the application, according to the fluid velocity and the flow rate. On the chart, the intersection of flow velocity and flow rate gives the appropriate diameter.

#### Note:

- For the fittings listed below, the corresponding nominal size in the bracket must be used:
  - External threads acc. to SMS 1145
  - Weld ends acc. to SMS 3008, BS4825-1/ASME BPE/DIN 11866 series C or DIN 11850 series 2/DIN 11866 series A/ DIN EN 10357 series A
  - Clamp acc. to SMS 3017, BS 4825-3/ASME BPE or DIN 32676 series A.
- For all other fittings, the corresponding nominal diameter without bracket applies.

#### Example 1:

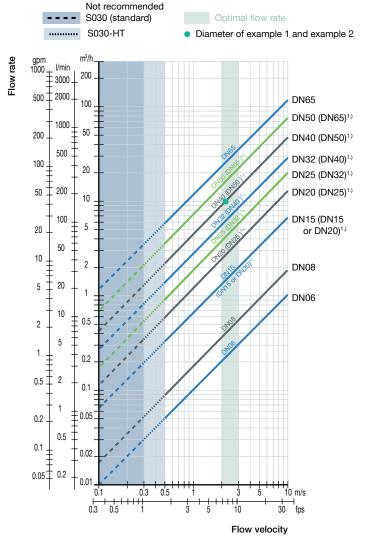

- nominal flow: 10 m<sup>3</sup>/h
- optimal flow rate: 2...3 m/s

Result: Select a pipe size of DN 40

#### Example 2 with external threads according to SMS

- 1145:
- nominal flow: 10 m<sup>3</sup>/h
- optimal flow rate: 2...3 m/s

Result: Select a pipe size of DN 50

1.) See note at the beginning of this chapter.

# 7. Product operation

#### 7.1. Measuring principle

When liquid flows through the pipe, the paddle wheel with 4 inserted magnets is set in rotation producing a frequency signal in the transducer (Hall sensor) of the mounted transmitter. The rotation is detected contactless through the sensor-fitting wall. The frequency modulated induced voltage is proportional to the flow velocity of the fluid.

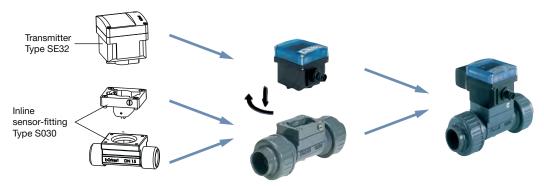

# 8. Product design and assembly

### 8.1. Product assembly

Note:

- A complete device to measure the flow rate is made up of an sensor-fitting Type S030 equipped with a paddle wheel sensor and a Bürkert transmitter Type SE30, SE30 Ex, SE35, SE36 or 8611.
- The sensor-fitting Type S030 ensures simple installation into pipes from DN 06...DN 65. The transmitter Type SE30, SE30 Ex, SE32, SE35, SE36 or 8611 can be mounted on any sensor-fitting Type S030 and fastened with a bayonet catch.
- The drawing shows the assembly of a sensor-fitting Type S030 with a process true union connection with nut and solvent/fusion socket and a transmitter Type SE32 (Type S030 + Type SE32 = Type 8032). This also applies to all variants of process connection and compatible type of transmitter.

See Data sheet Type 8030 Inline flowmeter, Data sheet Type 8032 Inline flowmeter/threshold detector, Data sheet Type 8035 Inline flowmeter or batch controller, Data sheet Type 8036 Inline flowmeter, ELEMENT design or Data sheet Type 8611 eCONTROL - Universal controller for more information.

# 9. Product accessories

#### Note:

Since March 2012, the Type S030 sensor-fittings in DN 15 and DN 20 have been available in 2 variants with different K factors. Further infor-mation can be found in the user manual in the K factor chapter, see **Type S030/Type S030-HT**. The 2nd variant is identified by the "v2" marking. This "v2" marking can be found:

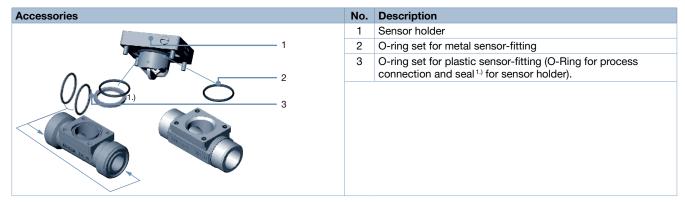

• on the bottom of the DN 15 or DN 20 sensor-fitting in plastic

• on the side of the DN 15 or DN 20 sensor-fitting in metal  $(\sqrt{2})$ 

(V2)

1.) Depends on sensor armature variant: flat seal to use for armature with groove (previous variant, no longer available), O-ring seal to use for armature with chamfer (variant "v2")

# 10. Networking and combination with other Bürkert products

Example:

1.) Only for SE30Ex: depending on the category, to be used with an intrinsic safety barrier with NAMUR input

# 11. Ordering information

#### 11.1. Recommendation regarding product selection

A complete device to measure the flow rate is made up of a compact sensor-fitting (Type S030) with paddle wheel and a transmitter (Type SE30, SE30 Ex, SE32, SE35, SE36 or 8611).

Two different components must be ordered in order to select a complete device. The following information is required:

- Article no. of the desired flow transmitter (see Data sheet Type 8030, Data sheet Type 8032, Data sheet Type 8035, Data sheet Type 8036 or Data sheet Type 8611)
- Article no. of the selected S030 sensor-fitting (see chapter "11.2. Ordering chart" on page 17)

Sensor armature made of stainless steel with paddle wheel (PVDF), seal (EPDM), screws and test certificate for DN 15 (except DN 15 v2 and DN 20 v2)DN 65	432305
Sensor armature made of stainless steel with paddle wheel (PVDF), seal (EPDM), screws and test certificate, Ra int. <0.8 μm for DN 15 (except DN 15 v2 and DN 20 v2)DN 65	434149
Sensor armature made of stainless steel with paddle wheel (PP), seal (EPDM), screws and test certificate for DN 06, DN 08, DN 15 v2 and DN 20 v2	554896
Sensor armature made of stainless steel with paddle wheel (PP), seal (EPDM), screws and test certificate for DN 15 (except DN 15 v2 and DN 20 v2)DN 65	449425
Sensor armature made of brass with paddle wheel (PVDF), seal (FKM), screws and test certificate for DN 06, DN 08, DN 15 v2 and DN 20 v2	448677
Sensor armature made of brass with paddle wheel (PVDF), seal (FKM), screws and test certificate for DN 15 (except DN 15 v2 and DN 20 v2)DN 65	432304
Sensor armature made of brass with paddle wheel (PVDF), seal (EPDM), screws and test certificate for DN 15 (except DN 15 v2 and DN 20 v2)DN 65	432303
Sensor armature made of brass with paddle wheel (PP), seal (EPDM), screws and test certificate for DN 15 (except DN 15 v2 and DN 20 v2)DN 65	449866
Sensor armature made of PVC with paddle wheel (PVDF), seal (FKM), screws and test certificate for DN 06, DN 08, DN 15 v2 and DN 20 v2	448674
Sensor armature made of PVC with paddle wheel (PVDF), seal (FKM), screws and test certificate for DN 15 (except DN 15 v2 and DN 20 v2)DN 65	432298

Sensor armature made of PVC with paddle wheel (PVDF), seal (EPDM), screws and test certificate for DN 15 (except DN 15 v2 and DN 20 v2)DN 65	432297
Sensor armature made of PVC with paddle wheel (PP), seal (EPDM), screws and test certificate for DN 15 (except DN 15 v2 and DN 20 v2)DN 65	443982
Sensor armature made of PP with paddle wheel (PVDF), seal (FKM), screws and test certificate for DN 15DN 65	432300
Sensor armature made of PP with paddle wheel (PVDF), seal (EPDM), screws and test certificate for DN 15DN 65	432299
Sensor armature made of PP with paddle wheel (PP), seal (FKM), screws and test certificate for DN 15DN 65	552881
Sensor armature made of PP with paddle wheel (PP), seal (EPDM), screws and test certificate for DN 15DN 65	443983
Sensor armature made of PVDF with paddle wheel (PVDF), seal (FKM), screws and test certificate for DN 06, DN 08, DN 15 v2 and DN 20 v2	448676
Sensor armature made of PVDF with paddle wheel (PVDF), seal (FKM), screws and test certificate for DN 15 (except DN 15 v2 and DN 20 v2)DN 65	432302
Sensor armature made of PVDF with paddle wheel (PVDF), seal (EPDM), screws and test certificate for DN 15 (except DN 15 v2 and DN 20 v2)DN 65	432301
Sensor armature set for High Temperature variant	
Sensor armature made of stainless steel with paddle wheel (stainless steel), seal (FKM) and screws for DN 15 (except DN 15 v2 and DN 20 v2)DN 50	551764
Sensor armature made of stainless steel with paddle wheel (stainless steel), seal (FKM) and screws for DN 06, DN 08, DN 15 v2 and DN 20 v2	449723
Sensor armature made of stainless steel with paddle wheel (stainless steel), seal (EPDM) and screws for DN 15 (except DN 15 v2 and DN 20 v2)DN 50	551763
Sensor armature in stainless steel with paddle wheel (stainless steel), seal (EPDM) and screws for DN 06, DN 08, DN 15 v2 and DN 20 v2	449724
O-ring set	
FKM O-ring for metal fitting, DN 06DN 65	426340
EPDM O-ring for metal fitting, DN 06DN 65	426341
FKM O-ring for plastic fitting, DN 08	448679
FKM O-ring for plastic fitting, DN 15	431555
FKM O-ring for plastic fitting, DN 20	431556
FKM O-ring for plastic fitting, DN 25	431557
FKM O-ring for plastic fitting, DN 32	431558
FKM O-ring for plastic fitting, DN 40	431559
FKM O-ring for plastic fitting, DN 50	431560
EPDM O-ring for plastic fitting, DN 08	448680
EPDM O-ring for plastic fitting, DN 15	431561
EPDM O-ring for plastic fitting, DN 20	431562
EPDM O-ring for plastic fitting, DN 25	431563
EPDM O-ring for plastic fitting, DN 32	431564
EPDM O-ring for plastic fitting, DN 40	431565
EPDM O-ring for plastic fitting, DN 50	431566
Approvals and conformities	
3-point flow calibration certificate <sup>1.)</sup>	550676
Inspection certificate 3.1 (according to EN-ISO 10204)	803723
Test report 2.2 (according to EN-ISO 10204)	803722
Certification of conformity for the surface finish (according to DIN4762, DIN4768, ISO/4287/1)	804175
FDA declaration of conformity	803724

1.) S030 combined with the plugged-in flow transmitter, only for DN  ${\leq}200$
